DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to a liquid crystal display device, classified in class 349, subclass 141.
 - II. Claims 25-28, drawn to liquid crystal compositions, classified in class 252, subclass 299.01.

The inventions are distinct, each from the other because of the following reasons:

2. The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special

technical features for the following reasons: the claims of two groups are directed to different inventions which are not so linked as to form a single general inventive concept. In particular, the claims of group I can be formed without the step of inspecting as shown in claim of group II; therefore, the inventions are not linked in operation and might perform different operations.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

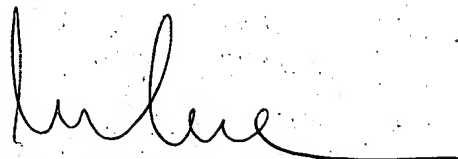

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
